3 Hydraulic sheet metal benders

Line of NC hydraulic press brakes, synchronised or torsion bar, fully customisable, bending sizes from 1600 to 6000 mm. useful, bending power from 40 to 500 ton. active table centring system, ESA touchscreen cnc up to 8 axes. 12-month warranty, after-sales service, 4.0 ready.

Synchronised bending machine 3-6-8 axes

Torsion bar bender

4 Hydraulic sheet metal shears

Line of hydraulic sheet metal cutting shears with numerical control guillotine or oscillating blade, useful cutting lengths from 2 to 6 m, cutting thicknesses from 1 to 20 mm, possibility to add pneumatic rear sheet metal holder. 12-month warranty, after-sales service, 4.0 ready.

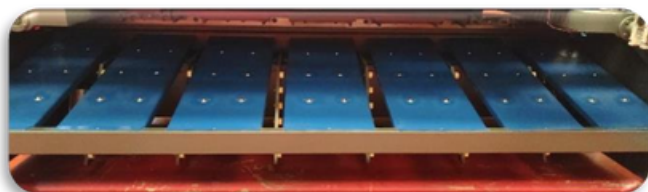

CNC 3-axis 4.0 ready

Guillotine shear

Oscillating blade shear

Pneumatic Sheet Metal Substitute

5

Sheet metal and tube laser cutting

Line of laser cutting systems with fibre generator, for flat sheet metal and tube and profile cutting. Configurable on request for every production need. From 1000 to 15000 watts of power, turnkey systems, transport, assembly, training course. 12-month warranty, after-sales service 4.0 ready.

Sheet metal fibre laser

Software cad/cam

2D/3D laser fibre tube cutting

New entry-level line

6 Sheet metal calendaring machines

Line of sheet metal calenders with 3 or 4 rollers configurable for every productive need, from 1 m to 4 m useful. Fully hydraulic, manual and cnc. 12 months warranty, after-sales service, 4.0 ready.

Calender 3 asymmetrical rollers

Automatic cnc calender

Calender 4 rollers total invitation

7 Hydraulic punching machines

Line of hydraulic punching machines for every need, from 45 to 120 ton of power, customisable on request also with numerical control and iron cutter version. Equipment on request, 12-month warranty, after-sales service, 4.0 ready.

Cnc punching machine

Portable punching machines

Universal punch and cutter

Profile curve

Manual and cnc profile bending line, shaft diameters from 45 to 200 mm, customisable to specifications. Standard tools for every profile on the market and on request for tube bending, double working position, vertical or horizontal, adjustable side guides, manual, visualised and CNC models. 12 months warranty, after-sales service, 4.0 ready.

Variable geometry profile curve

Hydraulic profile curve

Cnc hydraulic profile bending

9

Pipe bend

Line of machinery for bending metal tubes and rods, which can be equipped on request for different machining operations with both numerical and traditional control. 12-month warranty, after-sales service 4.0 ready.

10

Parallel lathes

Line of parallel lathes for every need, monolithic cast iron base. cast iron. High main motor power and generously sized spindle bore, 2-axis dimension display, Italian-style quick-change turret and self-centring spindle. Norton box. 12 months warranty, after-sales service.

800 mm to 6 mt. useful

11

CNC lathes

CNC lathe line with Fanuc or Siemens cnc, self-learning system, tool magazine with automatic change and high-speed spindle. Axis movements are mixed, on linear guides for the longitudinal and transverse axis, and with traditional turcite guides for the vertical axis. 12-month warranty, after-sales service, 4.0 ready.

Self-learning and cnc

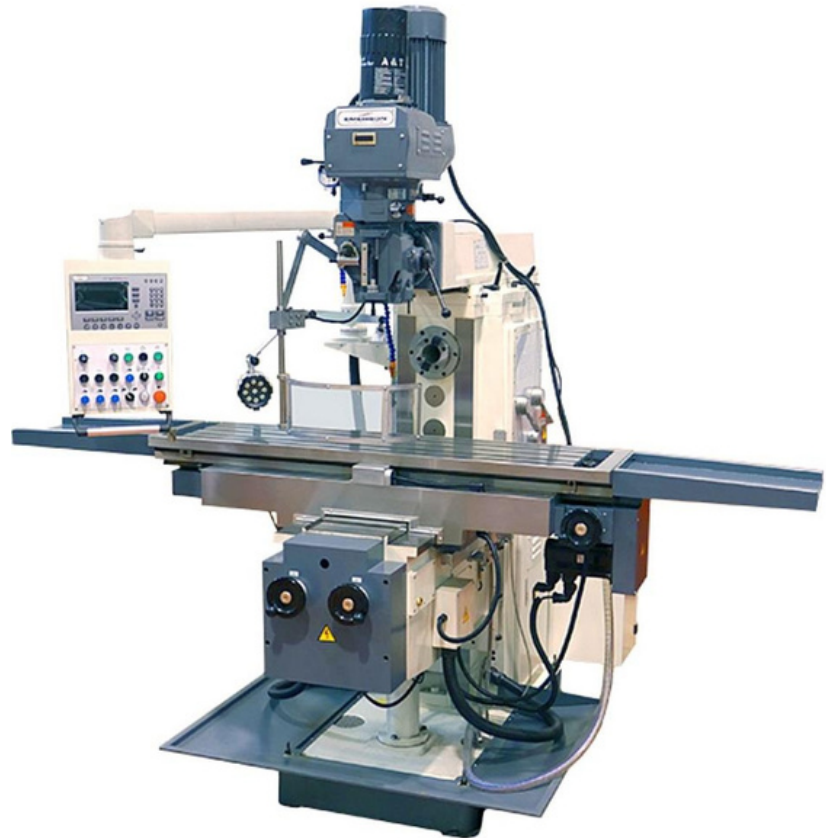

12

Milling machines

Line of milling machines for every need including cnc, Axis movement is controlled by brushless motors and ball screws, vertical and horizontal spindle are driven by an inverter device, 12-month warranty, after-sales service, 4.0 ready.

3-axis height display

Numerical control

13

Machining centres

Range of machining centres to suit all types of machining. Machines of different sizes to meet different production needs. Siemens or Fanuc numerical control, tool magazine with automatic change and high-speed spindle. 12-month warranty, after-sales service, 4.0 ready.

Numerical control

14

Column drills

Line of drills for all drilling requirements, characterised by great user-friendliness, reliability and robustness, 12-month after-sales service warranty.

Radial drills

Automatic descent

Horizontal and vertical movement selectors

Mechanical clutch

Flag vertical movement motor

Column drill

Milling drill

Gear drill

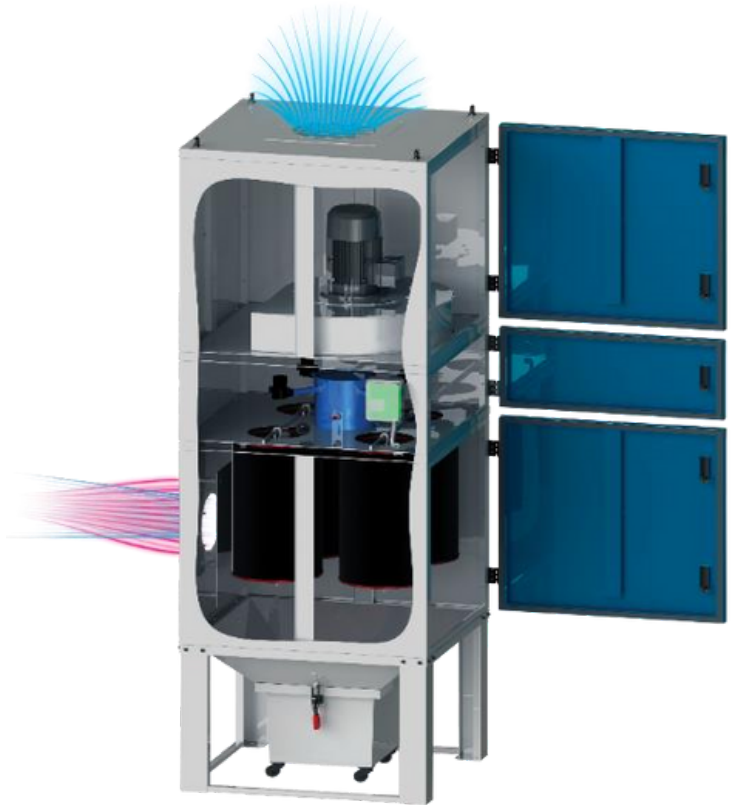

Flue gas filtering systems

Line of filtration systems for fumes and dust emitted by processing, in cooperation with the best experts in the field, study, design and construction of tailor-made systems, after-sales service.scheduled maintenance, 4.0 ready

Cartridge filters

Customised smoke filtering systems

Band saws

Line of band saws for all production needs, manual, semi-automatic and automatic cnc. 12-month warranty pot-sales service, spare parts for blades and related products. 4.0 ready.

Manual saws Semi-automatic saws

Double-column saws

Automatic cnc saws

17 Double-column bridge presses

Line of hydraulic bridge presses, standard models or made to specific requirements, from 40 to 300 tonne power, can be equipped with special tools, 12-month after-sales service warranty.

Stroke adjustment system

18

Eccentric presses

Line of mechanical eccentric presses from 30 to 150 ton of power, can be equipped with special tools, 12 months warranty after-sales service.

80-100 ton.

35-80 ton.

19

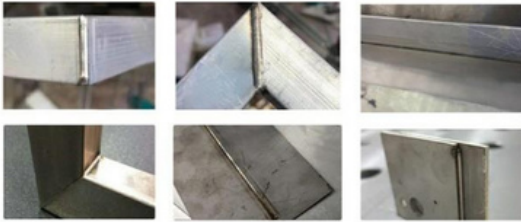

Machines for thin sheet metal processing

Complete line of machinery for processing thin sheet metal, cutting, bending, calendaring and edging, 0.5 to 3 mm thick, also ideal for use on construction sites, 12-month warranty after-sales service sale.

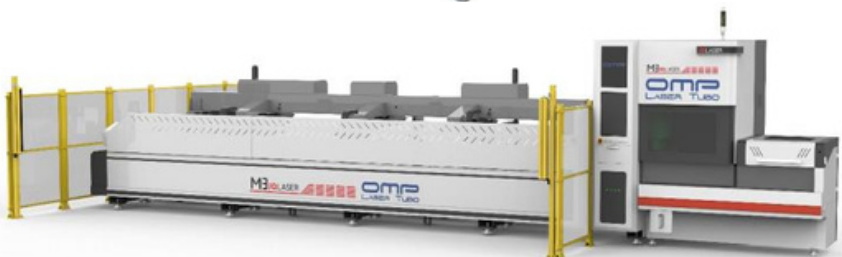

□ Laser welder

□ Portable punching machine

□ Feed punch bar

□ Entry-level laser tube cutting

21

Used machinery

More than 250 used machines of the best Italian or international brands, overhauled, can be viewed at our associated warehouses in northern Italy.

- Sheet metal working machinery
- Machining machinery
- Electric and diesel lifts
- Plant and equipment

Services

22

Konzu s.r.l.s in addition to trading in industrial machinery, offers various services to support companies.

Solutions to the most common problems related to the production of manufactured metal products, sheet metal working and mechanical machining in general, deformation, automatic cutting, chip removal and installations turnkey plants.

We offer real, customised solutions, with a vision to develop technological development, aimed not only at improving the finished product but also to simpler, faster realisation and with a lower investment of financial resources.

- Free consultations
- Transport and logistics
- Sell your machinery with us
- Customised tools
